

Computer Applications in Civil Engineering (CE) Lab

Computer Applications in Civil Engineering Lab: The department has its own computer lab that contains 42 PCs and a printer. General-purpose and specialized software packages like Microsoft Office, AutoCAD, STAADPro, SAP2000, Matlab, MathCAD, and Ansys have been installed in this lab. Although this lab is mainly used for the teaching of engineering drawing in the afternoons, it is also open for the use of students in the department during the mornings. Occasionally, this lab is utilized for demonstrating the application of modern computing tools in some of the advanced courses.

This lab is always available for students to practice using these softwares or to prepare their assignments by applying these softwares. Moreover, each one of the offices of the CE department in the engineering building has at least one decent computer with Internet access, making it easy to support the scholarly and professional activities of the students and faculty by interacting and connecting with thislab.
