

**National Architectural Accrediting Board (NAAB),
Program for International Certification.**

The Bachelor of Architectural Engineering offered by The Architectural Department at The Hashemite University is being assessed by the NAAB's International Certification (ICert) program. "International Certification" identifies a program as comparable in educational outcomes in all significant aspects to a U.S.-based program and indicates that it provides an educational experience meeting acceptable standards, even though such program may differ in format or method of delivery. While International Certification is not accreditation, ICert recognition by the NAAB represents that a program of architecture has achieved the highest standard of quality assurance in professional architecture education. The ICert process consists of three visits by a NAAB team to a program over a minimum of three years. A NAAB assessment team visited the architectural Department at The Hashemite University in November 2019 and December 2020. A decision on whether the program will receive the ICert designation is anticipated in 2020. The following ICert documents are available for download from the Architectural Engineering Department website:

- 2019 Conditions for International Certification
- 2019 Procedures for NAAB International Certification

Head of Architectural Department at HU
General coordinator of NAAB

Dr. Ahmad Alhusban
