

Anas Abu-Humaidan M.D. Ph.D.

Short bio: Interested in research and education involving medical microbiology and immunology, particularly host-pathogen interactions. Special interest in the complement system and its role in health and disease.

Phone: +962 7 79227922

Email: a.abuhumaidan@ju.edu.jo

Work Experience

09/2018 - Present

Assistant Professor, School of Medicine, University of Jordan

Responsibilities:

- Coordinating and teaching the course “Introduction to Microbiology and Immunology” for 2nd-year medical students.
- Teaching Microbiology and Immunology topics for 3rd-year medical students.
- Coordinating and teaching the course “Diagnostic molecular biology” for graduate students.
- Supervision of graduate students.
- Serving on several committees at the School of Medicine.

2/2012 – 9/2012

Teaching assistant, School of Medicine, University of Jordan

9/2010 – 9/2011

Medical intern, King Hussein hospital, Al Salt, Jordan

Education

12/2012 – 08/2018

Ph.D. program at The Faculty of Medicine, Lund University

- Researcher at the (infection medicine) department at the Biomedical center in Lund, Sweden.
- Thesis: *Rules of engagement - Regulation of complement response in tissue.* 2018
- Hyperlink to [Thesis on Lund University website](#)

9/2004 – 06/2010

Doctor of Medicine (M.D.), Faculty of Medicine, University of Jordan

- The Doctor of Medicine curriculum is a six-year undergraduate degree. It hyperlink is an interdisciplinary program, integrating biomedical sciences and clinical skills training
- Hyperlink to [Doctor of Medicine \(M.D\) / Program overview](#)

Additional skills

- **Teaching;** Experience in designing course material and teaching large classes. Used blended learning, flipped classroom, problem-based learning. Took courses in course design, delivery, and teaching presence.
- **Molecular techniques;** Experience in a variety of molecular techniques including: Western blotting, Immunofluorescence microscopy, flowcytometry, RNA and DNA purification, PCR and qPCR, protein mass spectrometry, recombinant protein purification.
- **Microbiology techniques;** Experience in a variety of microbiology lab techniques including: bacterial culture and killing assays, intracellular survival assays, and assays for virulence factors.
- Competent in programs involving data analysis and image processing (e.g. Excel, NIS elements, ImageJ, Photoshop).

Community service and volunteer experience

- Volunteered at *home away from home*- Omaha, Nebraska 2021
- Participated in workshops aimed at introducing students to research in medicine. Amman, Jordan 2019, 2020.
- *Refugee integration workshop, Malmö, Sweden 2017*
Translator (Arabic-English)
- *Symbiose 2017, Lund, Sweden*
Volunteer organizer
Biology and sustainability conference

Grants and professional honors

- “*Fulbright Junior Faculty development program award*”. (2021)
The award involved faculty development seminars, capacity building, volunteer work, pedagogical training among other activities. The program took place at the University of Nebraska Medical center, Omaha, Nebraska, US, in the period June-September 2021. The award covered travel, lodging, and all program activities.
- Received funding from *The Deanship of Scientific Research at the University of Jordan* to study the complement system in COVID-19 pathogenesis. (2021)
The funding will go to understanding how complement activation is involved in the severity of COVID-19, and the role of complement in

vaccine efficacy. The award amount was 8500 JD. The work is currently in progress.

Grants and professional honors (continued)

- Received funding from *The Deanship of Scientific Research at the University of Jordan* to study the role of intracellular H. pylori in antibiotic resistance, and how the immune system responds to intracellular H. pylori. The award amount was 13484 JD. The work is currently in progress.
 - Recipient of a research grant financed by *Endowments for the Natural Sciences, Medicine and Technology Fund “Kungliga Fysiografiska Sällskapet”*. (2015)
The funding went to understanding the role of the epidermal growth factor receptor (EGFR) in regulating complement in various solid cancers. The award amount was 50000 SEK. The work was published and the project was concluded.
 - Recipient of a scholarship for a fully funded graduate education abroad (2012) Faculty of Medicine - University of Jordan.
The scholarship provided a monthly stipend as well as travel expenses during the length of the PhD program at Lund University- Sweden in the period 2013-2017.
-
