

Hashemite University

Faculty of applied medical sciences

Department of medical laboratory sciences

Strategic Plan

2023-2021

The MLS department was established at 10/11/1998, while teaching did not start until the beginning of the academic year 1999/2000. It offers a BSC degree in MLS for students who are interested in rewarding career in analytical biomedicine. The students earn through this four-year program, special laboratory skills and provide community with highly skilled medical laboratory technologists able to work in public or private hospitals and laboratories, health and blood bank centers and research institutes.

Objectives:

- Pursuing knowledge, education, and professional training in the field of medical laboratory sciences.
- Providing local health care services and the community with highly qualified laboratory technologists.
- Providing regional and international market with highly skilled technologists.
- Providing scientific institutes with professional graduates capable of conducting research and performing different scientific studies.
- Graduating high-quality students capable of pursuing higher education in the field of laboratory medicine.

Strategies

Strategy (1):

- Developing the faculty members in the department by attending academic workshops and lectures.
- Motivating students to become creative.
- Encouraging positive relationships between students and faculty members.
- Providing academic support for students
- Renovating the infrastructure of the department class rooms and labs
- Encouraging and helping faculty members to conduct research
- Encouraging the attendance of scientific conferences
- Encouraging the hosting of scientific conferences.

Strategy (2):

To get the accreditation for a master a degree in medical laboratory sciences.

Strategy (3): Local community service.

- Participating in providing and preparing training courses for the local community.
- Providing scientific advice.
