Dean's message

On behalf of the faculty, staff, administrators and students, I am pleased to welcome you to the College of Nursing at the Hashemite University,

Our college is committed to excellence, innovation, passion, integrity, and effectiveness. These "guiding principles" ensure, among others, a commitment to excellence in everything we do, using innovative approaches to stay ahead in an ever-changing environment, achieving passion and integrity in all of our work, and using teamwork to maximize our effectiveness.

Our college was established in the academic year 1999/2000 and initially received 101 students in the undergraduate program. Since then, the number of students enrolled in our programs has been steadily increasing. We currently have 950 students in the undergraduate program and 35 students in the graduate program; We expect significant growth in our programs in the coming years.

Our college has strong systems in teaching the best and brightest clinical practice, education and research in nursing. Our teaching staff is expert and qualified in the fields of knowledge and is dedicated to educating the future generation of nurses. Our college works both locally and globally to achieve its mission and conduct research that drives evidence-based nursing care.

Most of the faculty members in our college are young enthusiasts with diverse experiences. In addition, some have dual qualifications, which makes our college more unique and distinguished. All faculty use Problem-Based Learning(PBL), Evidence-Based Practice (EBP), Information Technology (IT), and Simulation. Everyone works in a team spirit and is always looking for excellence in academia. The college has worked on updating the nursing plan for the undergraduate program in the academic year 2019/2020.

The college obtained high salaries and distinguished achievements. It culminated in the first place within the Academic Quality Assurance Project for the year 2006-2007, which was organized by the American Center for Academic Quality. The first uniquely in the university proficiency exam for the year 2006/2007 and the second place for the year 2005/2006. In the academic year 2008/2009, the college offered the first master's program for nursing in Jordan, specializing in mental health and oncology. In 2019, the department expanded to also include the health of mothers and women. Our programs, whether bachelor's or master's, are accredited by the Jordanian Accreditation Committee for Higher Education.

I invite you to join our college and experience a great nursing career. We are confident that your experience will be exciting and wonderful.

Prof. Dr. Shaher Hamad Ahmed Hamida

Dean of the College of Nursing

Introduction

About the College of Nursing

The Hashemite University College of Nursing was established in 1999 offering a four-year Bachelor's degree in Nursing (1999/2000). The College of Nursing at the Hashemite University was the first college of nursing in the city of Zarqa in Jordan that often offers the only source of nursing graduates in industrial areas. In 1999, in order to serve the local areas ,in the city of Zarqa and the surrounding countryside

The Bachelor of Nursing program was developed based on scientific study. Critical thinking and problem-based learning methods were adopted in the teaching and training processes in order to prepare qualified nurses for work. The program provides nurses with diverse and capable theoretical knowledge supported by clinical expertise that enables them to provide comprehensive nursing care and achieve advanced levels of leadership and management, as well as enabling them to participate and benefit from research aimed at improving the quality .of life for individuals and families in health and disease

Master's Program in Nursing at the College of Nursing - The Hashemite University was The playing advanced of also established in 2010 to prepare specialized nursing cadres capable manage health care for able to ,roles such as experts, leaders in their field of specialization . their patients, and consultants in various fields of nursing care

vision:

Our vision is for the School of Nursing to be a benchmark in nursing education and research nationally and internationally. Our graduates will be creative, skilled, caring and knowledgeable nurses in pursuit of excellence in healthcare and health promotion for .individuals, families and communities in collaboration with other health specialties

Message:

Deliver a high-quality undergraduate program in nursing that prepares competent skilled and ,adaptable life-long leaders to develop, disseminate and implement the latest evidence-based high-quality nursing knowledge in promoting and protecting the health and well-being of all individuals, families and communities, improving the nursing profession and developing the .health care system

Objectives:

:The College of Nursing with its Bachelor's and Master's programs in Nursing aims to

• Develop the specialized skills required by professional standards and the code of ethics .for students

• Achieving the goals and requirements of students and employers by providing rehabilitation and career enhancement programs in a manner that guarantees flexibility and .freedom of choice

• .Promote the advancement of nursing knowledge and skills

• Encourage personal and professional growth by enhancing skills that contribute to .career independence

• .Develop practice based on applied research and based on evidence and evidence

- External Equations Committee

College departments and specializations

1-   .Department of Community and Mental Health Nursing

,This department contributes with subjects within the bachelor's degree at the fourth year level where the department's subjects are often concerned with developing skills, behaviors and different orientations that enable the student to adapt to work conditions and communicate .with different types of patients in different cases and circumstances

At the master's level, the department offers a two-track program (comprehensive exam or . thesis), which includes subjects: Advanced Mental Health Nursing

The department employs ten faculty members; Nine of them hold a doctorate degree in three specializations (community health nursing, mental health nursing, leadership and management in nursing), in addition to a teacher holding a master's degree. The department has five clinical .instructors who supervise the training of students in on-the-job training sites

2-   .Department of Adult Health Nursing

The Department of Adult Health Nursing prepares and prepares students of the College of Nursing in the first, second and fourth year to work in laboratories and hospitals and to apply the skills of the nursing profession in practical fields, by offering basic subjects in .adult health nursing

At the master's level, the department offers a two-track program (comprehensive exam or .thesis) that includes subjects: Advanced Cancer Nursing

The department employs nine faculty members who hold doctorate degrees in three specializations (adult health nursing, critical care nursing, and cancer nursing), in addition to two teachers who hold a master's degree. The department also includes twelve clinical .instructors who supervise the training of students in practical training sites

3-   .Department of Maternal, Child and Family Health Nursing

The Department of Maternal, Child and Family Health Nursing plays an important role in preparing Bachelor of Nursing students at the third year level by offering basic subjects in .maternal and child health nursing to achieve the college's vision and mission

At the master's level, the department offers a master's program in Maternal and Women's and focuses on Health Nursing, which includes two tracks (comprehensive exam or thesis) developing advanced nursing skills in health care issues that concern women during .different life stages

The department employs six faculty members who hold doctorate degrees in three specializations (Maternal and Child Health Nursing, Child Health Nursing, and Midwifery), in addition to a teacher holding a Master's degree. The department includes ,nine clinical instructors who supervise the training of students on practical training sites .and one laboratory supervisor

The Hashemite University

Nursing Plan

2019-2020

Bachelor Degree Requirements for Nursing Science:

- The student should complete successfully the minimum of (137) one hundred and thirty seven credit hours.
- The credit hours are distributed according to the following study plan:

No. Requirements	Credit Hours
University Requirements:	27
A. Mandatory Requirements	12
B. Elective Requirements	15
Faculty Requirements	23
Specialty Requirements	84
A. Mandatory Requirements	72
B. Elective Requirements	12
Free Course	3
Total	**137**

Faculty of Nursing
Courses Description

0150701208 Communication Skills: credit hours: 3 (3+0), pre-requisite: 150702241 or concurrent.

General principles, concepts, and skills related to communication are provided to the nursing students to: communicate effectively with clients, families, colleagues, health team members, and others in their daily life; understand the human behaviors; and help individuals to adapt with their surrounding environment for the purpose of achieving the optimal level of health. It focuses on stimulating students to develop effective intrapersonal and interpersonal communication skills, and assist them to move from merely understanding of communication principles to their applications in life effectively.

150701403 Mental Health Nursing/Theory: credit hours: 3 (3+0), pre-requisite: 150703362 & 150703372.

The concepts of mental health, illness, and the cultural attitudes towards mental health patient are addressed. Special emphases are placed on the development of interpersonal skills, communication skills, and group processes. The course is based on a holistic and humanistic framework, emphasizing critical thinking, caring, and therapeutic nursing interventions. Nursing process forms the foundation of decision-making and encompasses all significant actions taken by nurses in providing relevant mental health care to all clients.

150701404 Mental Health Nursing/Clinical: credit hours: 3 (0+ 9), pr-requisite:150701403 or concurrent.

The clinical part includes using and applying steps of nursing process as a general framework to get benefit of the course content, and clarify ways of dealing with clients who complain of psychological, mental, emotional, spiritual, or/and sociological problems that have mental or psychological effects. Students are trained in health care institutions or community settings.

150701411 Community Health Nursing/Theory: credit hours: 3 (3+0), pre-requisite: 150703362 & 150703372.

The concepts of community health, types of communities, assessment manners, planning to protect community health, primary health care principles and means

of delivering care to individuals, families, and groups are explored. The roles of the community health nurse are viewed from a multifaceted, dynamic, and interactive perspective within the limits of a changing environment. In addition, this course explores the role of the primary health in Jordan in promoting community health, in particular in rural areas.

150701412 Community Health Nursing/Clinical: credit hours: 3 (0+ 9), pre-requisite: 150701411 or concurrent.

The clinical experience includes home visits, health education for clients, families according to the accurate scientific methods provided within a variety of settings with focus on the way of dealing and communicating with the elderly and providing care in the elderly settings.

150701451   Nursing Leadership and Management/Theory: credit hours: 3 (3+0), pre-requisite: 150701412 & 15 0701404.

Emphases of this course are placed on understanding various leadership and management concepts, theories, and models, particularly decision-making and problem solving strategies.

150701452   Nursing Leadership and Management/Clinical: credit hours: 3 (0+9), pre-requisite: 150701451 or concurrent.

Emphases of this course are placed on applying various concepts, theories, and models of leadership and management. This course aims at providing the students with knowledge and skills needed to help the students to act as leaders and managers after graduation.

150701405 Ethics of Science and Technology: credit hours: 1 (1+0), pre-requisite:150702241or concurrent.

The most important scientists of ethics is a sense of responsibility towards humanity in general, do not seek to abuse what God was built, and the secretariat of knowing that the world stands at what science knows with certainty, and does not provide what was taught and thought it just a guess. The values represent the moral center of gravity in the cultures of nations, the more rigidity of moral values, the more able to protect its civilization, the more began to abandon their ethics and their presence has offered to collapse and fall, those are the years of being God. And Bioethics is the study of ethical issues that arise in the areas of health care and biological sciences, as well as the study of social issues, legal and economic, that are relevant to ethical issues in order to achieve the principles of independence, justice, and non-interest abuse

150701315 Health Promotion and Disease Prevention: credit hours: 3 (3+0), pre-requisite: 150701241   or concurrent.

Basic concepts of health from infancy to adulthood up to aging, how the health can be promoted, and preserving the suitable health level are basic components of this course. This course includes developing, practicing and evaluating a holistic health program. Another focus of this course is the application of the general safety measures of the surrounded environment of individuals, families, or/and communities.

150701427 Primary Health Care Nursing: credit hours: 3 (3+0), pre-requisite: 150702244

This course will assist students develop advanced skills in primary health care activities such as health promotion and prevention. Areas such as screening strategies, smoking cessation, nutrition and healthy eating, alcohol management and physical exercise advice and management will be covered. In addition, students will learn to apply the principles of health teaching and adult learning to health promotion.

150701428 Geriatric Nursing: credit hours: 3 (3+0), pre-requisite: 150702244

This course will provide information on the care of the elderly. The theories and concepts of aging, the physiologic and psychosocial changes and problems associated with the process, and the appropriate nursing interventions are discussed.

170701253 Introduction to Nursing Informatics: credit hours: 3 (3+0), pre-requisite: 150702242 or concurrent.

This course focuses on understanding the use of information technology in nursing practice, education, research, and administration. The course intends to increase information technology literacy, knowledge and skills for undergraduate nursing students. Consideration is given to the effective and efficient management of information, including accessing, retrieval and evaluation of information from different courses, documentation and storage of information. Models and theories of nursing informatics are presented. Legal, ethical, economic, and cultural issues in information technology are discussed.

170701354 Special Topics in Health Informatics: credit hours: 3 (3+0), pre-requisite: 170701253

This course provides an introduction to the clinical decision support system (CDSS) and how it can help the healthcare provider to make the decision based on the data analysis, obtain the number of important benefits including: improve quality of care and enhanced health outcomes, and to avoidance of errors and adverse events, furthermore the improved efficiency, cost-benefit, and provider and patient satisfaction. Understand and develop the main types of CDSS such as the , knowledge base (e.g., compiled clinical information on diagnoses, drug interactions, and guidelines) and displays the results to the end user, or using the systems without a knowledge base which is rely on machine learning to analyze clinical data. Demonstrate the implementation of CDSS by

using variety of platforms such as: Internet-based, networked EMR, or a handheld device.

This course also, focuses on the main concepts and methods of healthcare business in general and especially in the healthcare informatics. Important content priorities of the course are the basics of Process Management and its potential, methods for analysing and improving processes and the potential of the use of ICT for process support. In addition to the theoretical fundamentals and concepts, the use of special modelling methods, e.g. the event driven process chain (EPC) or Business Process Modelling Notation (BPMN) using professional modelling tools are important topics.

Faculty of Nursing
Courses Description

1907021130 Introduction to Nursing/Theory: credit hours: 2 (2+0):

This course aims at introducing the first year nursing students to the nursing profession. It provides the students with the basic, yet vital, concepts and principles of the nursing profession such as professionalism, therapeutic communication, holistic nursing care, team work, and the roles of professional nurse. This course will enrich the students' knowledge about the legal and ethical aspects of nursing which will prepare the students to become professional nurses in the future.

1507021131 Fundamentals of Nursing/Theory: credit hours: 3 (3+0), pe-requisite: 140501211 or concurrent & 140501221 or 1907021130 concurrent

Basic understanding of certain key concepts and principles, which are fundamental to the practice of nursing, are th major milestones in this course. Historical influences on nursing practice as well as legal and ethical implications for nursing are included. Emphasis on the wellness- illness continuum. The student is introduced to the nursing process as a systematic method of problem solving in which effective communication and interpersonal relationships are central components. Knowledge about human basic needs is provided to meet the needs of the patient. Instructions throughout the course focus on the development of critical thinking skills necessary for the delivery of nursing care.

150702132 Fundamentals of Nursing/Clinical: credit hours: 1 (0+ 3), pre-requisite: 150702131 or concurrent.

Developing the students' basic nursing skills at the faculty of nursing labs is an essential component of this course. These skills are considered basics to actual nursing practice, which would enable individuals to attain optimum health. In addition, this course aims at developing student's ability in applying the nursing care process in the laboratories; this is considered as an essential step in preparing the students for real practical settings as hospitals and health care centers.

150702215   Health Assessment/Theory: credit hours: 2 (2+0), pre-requisite: 150702132.

Introducing the students to the skills required to conduct a comprehensive assessment is a starting point of this course. Emphasis is placed on the acquisitions, processing, and interpretation of data collected from adult client. Critical thinking skills will be utilized to analyze and interpret the data. Physical, psychological, sociocultural, and spiritual approached are used to assess the client and to incorporate consideration of client needs, state of wellness, developmental, functionality, and response to life experience.

<u>150702216 Health Assessment/Clinical: credit hours:1 (0+3), pre-requisite: 150702215 or concurrent.</u>

Practical applications of comprehensive health assessment skills, including the physical, psychological, social, and functional health aspects are basic components of this course. The process of data collection, interpretation, documentation, and dissemination of assessment data are addressed throughout the course.

150702241 Adult Health Nursing (1)/Theory: credit hours: 4 (4+0) , pre-requisite: 150702216 or concurrent & 150702281 or concurrent.

Defining health care modalities of adult patients and their families is a starting point of this course.. Physiologic; psychologic; and sociologic responses of adult patients with acute or chronic problems are essential milestones of this course. Emphases are placed on the roles of the professional nurse in the assessment of the patient's condition, planning of nursing care, nursing intervention, and evaluation of care in acute, chronic and care settings.Theoretical content includes the basic terminology, common causes, specific diagnostic procedures, and nursing management of each specific alteration in health.

150702243 Adult Health Nursing (2)/Theory: credit hours: 4(4+0), pre-requisite: 150702242 & 141702250 or concurrent.

Different care modalities, basic knowledge and skills required in providing high quality nursing care for adults with critical health conditions and their families are addressed. Emphases are placed on the roles of the professional nurse in the assessment of the patient's condition, planning of nursing care, nursing intervention, and evaluation of care in critical care settings

150702242 Adult Health Nursing (1)/Clinical: credit hours: 3 (0+9), pre-requisite: 150702241 or concurrent.

Practical applications of theoretical information through the use of the nursing process in assessing, diagnosing, planning, and providing high quality nursing care for adult patients in acute and chronic care settings are essentials of this course. Basic needs and appropriate nursing care for older adults are emphasized. This course will provide the students with opportunity to interact, communicate, and provide nursing care to highly-diversified and carefully-selected clients with different diagnosis.

150702244 Adult Health Nursing (2)/Clinical: credit hours 3 (0+9), pre-requisite: 150702243 or concurrent.

Applications of the theoretical information through the use of nursing process, critical thinking and problem solving skills in providing nursing care of adult

patients who are experiencing cardiovascular, pulmonary, neurological, sensor-neural and integumentary problems that require critical care.

150702281 Pathophysiology: credit hours: 2 (2+0), pre-requisite: 140501221

External and internal stress factors infleuncing the human body and how the body responds and adapts to such triggers are studied. Special considerations are given to genetic abnormalities, the immune system response, tumor growth and control and other responses of body systems to such changes.

150702421 Clinical Practicum and Professional Adaptation: credit hours: 3 (0+9), pre-requisite: 150701412 & 150701404.

At all clinical settings in general and at hospitals in particular, this course is aiming at developing students' knowledge and skills, which will assist the students to do the transition required for the roles of competent nurse.

150702422 Critical Care Nursing: credit hours: 3 (3+0), pre-requisite: 150701404 &150701412.

This course focus on the integration of knowledge and skills to provide effective and efficient nursing care to critically ill adults, infants and children as well as family and community. In this course, nursing process and nursing theories will be applied to clients (persons, families, groups, and communities) experiencing acute and complex care needs, which may be life-threatening.

150702423 Emergency Care: credit hours: 3 (3+0), pre-requisite: 0150702244

This course focuses on the theoretical knowledge about emergency nursing which is an essential component of health care delivery system. This course is designed to give students the chance to gain in depth understanding of nature of emergency nursing and role of nurse in meeting different needs of patient. It provides the students with knowledge that will help them to provide efficient nursing care during emergency and disaster situations either in pre-hospital settings or in hospital setting and also in disasters. This module will include three main parts namely basics of emergency, first aid and emergency nursing care for trauma in the different body systems and first aids and emergency nursing care for specific medical emergencies. Critical thinking and problem solving is emphasized.

150702425 Pain Management: credit hours: 3 (3+0), pre-requisite: 150703362 & 150703372.

This course will provide students with the opportunity to be educated on the issues related to end-of-life care and pain management through self assessment, interaction and skill development in order to improve their effectiveness as nurses,

employees and in their own personal relationships. The course consists of an introduction, 5 course lessons, a glossary, a reference list, Links to Knowledge, and a posttest. Also, within the course are several reflective and interactive exercises where students can assess their understanding of the material. Also, this course is intended to present an overview of the diagnosis and the comprehensive treatment of a wide range of painful disorders.

Faculty of Nursing
Courses Description

1907031314 Scientific Research and statistical methods in Nursing: credit hours: 3 (3+0), pre-requisite: -01907021243 or concurrent.

This course addresses principles of critical thinking and the professional nurse as a researcher, and a consumer of research and its results. The content of this course aims to develop and update the learner's ability to differentiate between ways of knowing facts with emphasis on how a scientific inquiry build a knowledge base for the nursing profession. The course focuses on research processes, ethical considerations of nursing research, problem selection and statement, literature review, conceptual and theoretical frameworks, variables, hypothesis, research questions, research designs, sampling techniques, data collection and measurement methods.

This course focuses also focuses on techniques of statistical analysis methods as a core component in the application of the research method in nursing and heath care. It covers theory of probability and distribution, research data summarization using standard descriptive statistical methods, and hypothesis testing using inferential statistics.

150703361 Maternal-Family Health Nursing/Theory: credit hours: 3 (3+0), pre-requisite: 150702244.

Physical, psychological, mental, emotional, social and economical aspects that affect women health care during antenatal, intrapartum, and postpartum stages are stressed out all over stages of the course . Also, this course emphasize on the health assessment and health maintenance of the woman and the newborn. Students also are introduced to birth spacing and fetal development. Issues related to maternal-child health and reproductive care in Jordan also will be discussed.

150703362 Maternal-Family Health Nursing/Clinical: credit hours: 3 (0+9), pre-requisite: 150703361 or concurrent.

Practical applications of theoretical information through applying the nursing process and principles of primary health care for mothers and newborn are major milestones in this course. Women and families during the childbearing period will be examined. Experience in preventive, supportive, and therapeutic care is offered through clinical experience in different settings of the obstetrical and gynecological floors, primary care settings, and different community settings that offer care for women and families.

150703371 Child Health Nursing/Theory: credit hours: 3 (3+0), pre-requisite: 150702244.

Concepts of health promotion and maintenance, and the prevention of illness and accidents, in addition to health assessment and selected physiological health problems are the major concepts of this course. Also, various physiological and social issues and health problems that face children such as inorganic failure to thrive, child negligent, and child abuse are discussed. Nursing management relevant to each problem is discussed using the nursing process, developmental theories, new trends, and recent approaches in managing and caring of children.

150703372 Child Health Nursing/Clinical: credit hours: 3 (0+9 clinical), pre-requisite: 150703371 or concurrent.

Practical applications of theoretical knowledge and basic skills in providing holistic care for children and their families are major concepts in this course. Furthermore, students are encourged to use nursing process and problem based-learning for promoting and restoring health of children and their families.

150703363 Growth and Development: credit hours: 3 (3+0), pre-requisite: 150702243 or 140503140.

Growth and development principles through different age stages of human life are assessed. Furthermore, nursing strategies which can be used for health maintenance, growth protection, and safe development will be emphasizesd through this course.

150703463 Nursing Midwifery: credit hours: 3 (3+0), pre-requisite: 150703362 or concurrent.

This course provides general nurses with basic midwifery knowledge; which will help them to be able to direct their own learning; exercise clinical judgment and work in a range of clinical
settings including ante and postnatal departments; also, collaborate effectively to promote quality outcomes for women and babies. This course includes description of high risk pregnancy, complication of labour, and post partum complication's nursing care. Also, it includes nursing care of reproductive system diseases. Over the duration of the course, students are also required to follow 3 women throughout their ninth month of pregnancy, birth and the period after birth. This requires students to be on-call to attend the labour and birth.

150703473 Neonatal Health Nursing : credit hours: 3 (3+0), pre-requisite: 150703372 or concurrent.

This elective course provides general student nurses with basic theoretical and practical knowledge to manage the health care needs of newborns/infants in neonatal care units. In addition to its focus on well and normal newborns, it focuses

on the pathophysiology, management and evaluation of newborns/infants with acute and chronic health problems. Covered topics will include characteristics of normal newborn babies, fetal growth and development, neonates at risk for different diseases, nursing care of neonates with alterations in respiratory, cardiovascular, gastrointestinal, neurological and urological systems. The course will also focus on specific topics such as neonatal jaundice, Infants of Diabetic Mothers (IDM) and hypoglycemic neonates, nutritional problems, infectious disorders and birth defects.

Practical Training Policies

Based on the agreements concluded between the Hashemite University and other official bodies such as the Ministry of Health, the Royal Jordanian Medical Services and some other health institutions in the private sector in addition to the Ministry of Education, nursing students at the Hashemite University receive their clinical or practical training in different places in order to achieve the objectives of the practical subjects . This includes the places of practical training hospitals (governmental, private, military, educational), health centers

(primary, comprehensive, maternity and childhood, rehabilitation), schools and homes for the elderly, in addition to home visits. , Zarqa, Irbid, and Mafraq.

Clinical Training Policies

Students are responsible for reviewing and complying with all instructions related to clinical and practical training, including those related *to attendance and absence, general appearance and grooming, public safety, use of a movement . Buses and duties*

1-   Attendance

- Unless the nature of the practical material requires a different arrangement, students are expected to be present in the training places on the days designated for that and in special uniforms at eight in the morning, and they are expected to leave their training places at two in the afternoon.
- in status last student And for the time first When he comes to the training venue until 08:15, he will be given a first warning.
- In the event that the student is late for the second time to the place of training until 08:15 Second One mark is also deducted from his mark within a warning will be given to him, the "Overall Assessment".
- In the event that the student is late for the third time to attend the training place until the hour So he will be warned 08:15 third and discounts Marker one His mark is included in the "comprehensive assessment" and the student must review coordinator The Worker for a substance.
- In the event that the student is late to the training venue until 08:30, 2.5 will be deducted from his mark in the "comprehensive assessment" and the student must review the general coordinator of the course.
- Students are expected to fully comply with the training days. Note that, according to the instructions and regulations of the Hashemite University, the student's absence must not exceed 15% of the total hours of the course, which is equivalent to one day of training. Note that it is not allowed for the student absence Except in condition Entry the hospital or condition death From First class - no God-or because of a circumstance Emergency .and persuasive
- If the student leaves the place of his training, even for a temporary period, he must inform the responsible nurse or teacher

2-   general look and grooming

- Students are expected Taking care of their personal appearance and adhering to the uniform designated for clinical training for the duration of their stay in the training places Includes:
o   Be careful to appear professionally, and this entails maintaining hair styling (while preventing abnormal or striking hairstyles), shaving or limiting the beard for males, and tying the hair or keeping the veil folded inside the dress for females It is forbidden state Make-up or manicures accessories lenses cosmetic eye in the form of .ultimate
o   Maintain personal hygiene and trim nails.
o   Take care to be official wear For training ironed, clean and in accordance with specifications (for males: shirt friend qsm trouser, navy blue fabric loose plain, carafe Navy blue (optional), black shoes, and apron medical White bears the university logo and card The name student identification; Female: the kit or robes residential according to Specifications

Advertiser about her, hijab A princess white Shoe, white Closed, white medical apron bearing (the university logo and the student's name card

- If the student violates the instructions for general appearance and grooming for the first time, he will be given a first warning.

- If the student violates the general appearance and grooming instructions for the second time, a second warning will be given to him, and one mark will be deducted from his mark in the "comprehensive assessment".

- In the event that the student violates the general appearance and grooming instructions for the third time, 2.5 will be deducted from his mark in the "comprehensive assessment" and the student must review the general coordinator of the subject.

- In addition to adhering to the special dress, the student must bring a small notebook, scissors, a headset, a ballpoint pen and a small photodetector for the use of the clinical examination.

3-   Public Safety

- Students must maintain the safety of themselves, their colleagues, the medical staff, and the recipients of health and nursing care during their training. Students in particular are prohibited from:

o   Performing a venous puncture for healthcare recipients without the supervision of the responsible nurse or teacher.

o   Receive doctor's verbal orders, over the phone, or receive emergency lab reports.

o   Act as a witness to sign official documents (eg authorization documents for the patient's consent to perform surgeries).

o   Carry the keys to the drug locker.

o   Giving medicines to health care recipients in general, especially those that are given directly intravenously(IV Push .without the supervision of the responsible nurse or teacher (

o   Adding insulin or anticoagulant drugs to intravenous solutions for healthcare recipients without the supervision of the responsible nurse or teacher.

o   Inserting or removingsmall lumen feeding tubes orintestinal decompression tubes

- Adhere to infection prevention measures (such as washing hands and wearing gloves) when dealing with health care recipients and handling sharp medical tools according to the protocols followed.

4-   Use a movement bus

- Students are responsible for arriving at and departing from clinical training venues Be and for the purpose of alleviating our students The university provides transportation for students From the University to each other Places training and vice versa. Accordingly, and to maintain the continuity of this service, students must abide by the following:

o   the gathering in the place allotted According to the agreed time and attire the official

o   maintain on me cleanliness Bus with no smoking and eat foods and drinks inside the bus.

o   Maintain the safety of chairs and bus attachments.

o   Prevent employment songs on me mobile phones Or the bus recorder as it is not allowed to talk with voice .loud or singing

o   Not allowed for the student that to bounce yalzia for special going up to me .bus

o   Students are not allowed to download or download them on me the road .Is it cause

o   Commitment B uniforms private .Back and forth

o   .Avoid quarreling or verbally assaulting others, including the bus driver
•   requester that upset instructed a movement ride bus will prevent of taking advantage of This service Throughout the training period in the semester in which the offense was committed And the He endures The offending student is responsible Access to place training .Practical and on time specified

5-   Communicate with others and perform tasks

•   on me students act tactfully With all From The patients Visitors and health staff and colleagues and teachers Inside the training places and not fabricate how are you to get involved, and accordingly must requester in case its occurrence in What is the problem - God forbid - that I review his teacher and not act .alone?
•   on me all students Commitment by laws and policies Hospitals Such as Policy No smoking, conservation policy on me Secrecy the patient
•   on me all students Avoid gathering Outside Rooms The patients or on breaks The patients fuller rooms the doctors and nursing Reception platforms in the departments
•   If the student is absent without a convincing official excuse from a scheduledoral presentation , such as a seminar or case study or health education or the like, he will not be compensated for that at all .It has a zero mark.
•   In the event that the student is late in submitting the practical training requirements according to the time specified by the practical teacher or the coordinator, he will not receive from him and the mark will be calculated for him as zero.
•   Cheating is prohibited and based on it in status M Adjust requester in an incident Cheats for practical training It was He transferred another worksheet or other than the satisfactory condition assigned to him without prior notification and approval from the teacher, so the student is subject to the cheating regulations in force at the Hashemite University.

Instructions for using simulation labs

designed Simulation laboratories in order to enhance the educational process for students. Accordingly, the following students are expected:

•   Commitment to behavioral controls that ensure the continuity of the educational process within laboratories.
•   Adhere to the uniform for practical training inside the laboratories, washing hands and wearing paws before using educational toys.
•   .Refrain from eating, drinking and smoking in laboratories
•   Using educational tools, toys and computers for the purpose for which they were designed and after receiving instructions on how to use them.
•   Not to take the laboratory tools outside or change their place without the request of the responsible supervisor
•   Use educational tools and educational toys with great care and return them to the situation and shape they were in before use.
•   .Handling sharp medical instruments according to the established protocols
•   Mobile phones and cameras must be kept closed in laboratories, and it is not allowed to publish or photograph educational exercises
•   Writing on educational toys is prohibited, and ink pens andmarkers are not permitted to be used alongside educational toys.
•   .Do not sit on the beds inside the laboratories

- Report any defect or injury to laboratory tools or educational toys to the responsible supervisor and immediately.
- Turning on or off the simulators is not a student's job and falls under the responsibilities of the responsible supervisor only.

I.Grading Scale			
Note. In-course assessment mark is provided in two decimal points and the final exam marks in one decimal.			
Letter Grade	Numeric Value	Range	Description
A+	4.00	> 88.0%	Exceptional performance
A	3.75	84.0 – 87.9	
A $^-$	3.50	80.0 - 83.9	
B $^+$	3.25	76.0 - 79.9	
B	3.00	73.0 - 75.9	Very good performance
B $^-$	2.75	70.0 - 72.9	
C $^+$	2.50	65.0 - 69.9	
C	2.25	60.0 - 64.9	Satisfactory performance
C $^-$	2.00	57.0 - 59.9	
D $^+$	1.75	54.0 - 56.9	
D	1.50	50.0 - 53.9	Minimally acceptable performance
F	0.0	< 50.0	Unacceptable performance

Professional and Ethics

Professional versus unprofessional behavior in the classroom in face-to-face learning, distance learning, or in laboratory/clinical application in different health institutions.

Nursing students should impart professional behavior and avoid unprofessional behaviour. The following examples reflect both professional and unprofessional behavior:

1- Professional Behaviors:

• Students are required to attend classes, online lectures, clinical laboratories, and campus laboratories.

• Students should focus primarily on the objectives of the course

• Students must inform faculty members of their absence before an appropriate period of time for the lecture or clinical training, unless it is an emergency.

• Students are expected to maintain high standards of academic honesty and integrity in accordance with college and university academic law

• Students are expected to behave as mature, honest, responsible and ethical people.

2- Unprofessional behaviour:

• Ignore proper dress and/or personal hygiene.

• Delay.

• Using abusive or abusive language.

• Reckless treatment of patients, their colleagues and faculty members.

• Smoking and/or using alcohol.

• Abuse or misuse of drugs.

• Unexcused absence from clinical training or lectures.

• Unethical behavior as defined in the Jordanian Code of Ethics

3- Unsafe Clinical Behavior:

The College of Nursing has a responsibility to protect the community. Thus, any student who has been involved in any situation that may have potential consequences for violating safety standards will be subject to immediate expulsion from the clinical field and/or a failing grade in the clinical training subject. Furthermore, the committees responsible for the practical training reserve the right to terminate the clinical training of the offending student in all different health institutions as necessary to maintain the safety of the clinical training and to ensure the quality of patient care. Unsafe clinical behavior occurs when a student:

• violates or threatens the physical integrity of patients, for example: careless use of side rails, restraints; comes unprepared for clinical work; Leaves the bed in a high position.

• Violates or threatens the psychological well-being of patients, for example: using clichés frequently, discouraging expressing one's feelings and feelings, not recognizing differences in ability to communicate, not documenting or acting on changes in behavior.

violates or threatens the microbiological integrity of the patient, for example: unrecognized •
violation of aseptic technique and general precautions; The student brings infectious diseases
to the clinical training site; Unrecognized violation of the isolation procedure.

violates or threatens the chemical safety of patients, for example: violates the 5 Drug •
Administration Rights; fail to safely monitor intravenous administration; Fail to identify and
follow up on significant nursing effects related to medication.

Violates or threatens the thermal safety of the customer, for example: failure to observe safety •
precautions during oxygen therapy, heat/cold applications; He leaves an unreliable patient
alone when he smokes.

Inadequately and/or inaccurately uses the nursing process, eg: failure to monitor and/or report •
critical evaluation regarding patients.

Violates principles/learning/objectives previously mastered in implementing nursing care •
skills.

Assumes inadequate autonomy in actions or decisions, eg: Fails to seek supervision when a •
situation is in doubt.

Any other facts or circumstances that are likely to violate the safety standards •.

4-   ethics related to the nursing profession

Honesty: Required in both written and oral communications within the classroom and clinical
settings. Penalties that may be imposed include, but are not limited to, dismissal, expulsion,
student attendance and failure in the course. A student dismissed for dishonesty will not be
eligible for readmission into the nursing program.

Confidentiality: Confidentiality is required with respect to patient information including, but
not limited to, written, printed, oral or observed information and status. A breach of
confidentiality is grounds for dismissal from the nursing program.

Safe Practice: Safe practice is required at all clinical training sites. Students are expected to
demonstrate behavior that leads to safe practice. Failure to demonstrate these behaviors can
result in faculty-set penalties and/or dismissal from the program. Expected behaviors are
outlined in the Clinical Assessment Tool for each semester.

Public Safety

:Laboratory Safety Tips

1.   Students are directed to practice and demonstrate the many nursing skills in the faculty's laboratories with their clinical instructors.

2.   Students must practice safe technique while in the clinical laboratory. Standard precautions should always be followed.

3.   Students must wear a white lab coat inside the lab.

4.   When breaking the ampoules used for training, students should protect their fingers with a gauze cover or alcohol handkerchief and the ampoule should be broken in the opposite direction to their face.

5.   Needles for injectable practice are used in clinical laboratories only when a clinical instructor is present to assist.

6.   Students must demonstrate safety precautions while using needles during training as instructed in class.

7.   Students should only practice injecting on dummies in the clinical laboratory.

8.   Needles and other sharp objects should not be disposed of in the trash or left open in the laboratory at any time.

9.   Fluids can be used for practice and explanation. These fluids are not for internal use, but for dwarf training only.

10.   Students are instructed in the principles of body mechanics before practice when applying these skills.

11.   Students should be careful when practicing their lifting skills and should not lift another heavy student without assistance.

12.   Equipment needed to practice proper body mechanics (bed, wheelchair, stretcher, etc.) is kept in good working order. Any broken part must be reported immediately to the Nursing Laboratory Officer.

13.   All equipment (wheelchairs, stretchers, beds) are wheeled during training and back.

14.   Simulation equipment (models) require gentle handling.

15.   Waste and single-use materials should be disposed of in appropriate containers before leaving the laboratory.

Safety action lines in hospital clinical training

1.   All students must receive the hepatitisB vaccine before beginning clinical practice in a hospital Or prove by examination that he has immunity against hepatitis .B

2.   All students are required to wear a uniform and a white lab coat during the practical training day

3.   Students should be familiar with the care, handling, and proper use of equipment prior to use in the hospital.

4.   Students should only perform nursing skills (such as venipuncture) under the supervision of an instructor or registered nurse.

5.   Students must maintain patient confidentiality.

6.   Students should know how to communicate effectively with patients, their relatives and the health team.

7.   All students are responsible for notifying their teacher(s) if they are taking any medications, which may affect students' ability to provide safe and competent care.

8.   Students must not receive verbal orders, telephone orders from physicians, or lab reports.

9.   Students must not act as a witness to the signing of documents (surgery permits, etc.)

10.   Students must not carry medication/substance keys.

11.   Infection control should be used all the time in the medical field, which includes:

•   hand hygiene

•   Use personal protective equipment when handling blood, body material and secretions.

•   Appropriate handling of patient care equipment and furnishings.

•   Eating and drinking is not allowed inside the clinic area

12.   Take care to prevent injuries when using needles and other sharp objects.

13.   Do not re-stick needles after use and dispose of them in sharps containers.

14.   All sharps thought should be disposed of in sharps containers.

15.   Commitment to public safety rules related to corona disease, such as physical distancing, wearing a mask, washing hands.

16.   If any accident or injury occurs to a clinical area (such as a needle stick) it should be immediately re-transferred to the Clinical Trainer, Staff Health Services or the emergency room for treatment as soon as possible. Follow the college's policies regarding accident or accident reports.

17.   All students should be familiar with healthcare waste management in the clinical area.

•   Medical waste in yellow bag

•   Infectious waste in a red bag

•   Chemical waste in a blue bag

•   Non-hazardous waste in black or white bag

18.   Any student with physical, mental, or educational health problems should inform the course coordinator to help him/her better adapt to the course requirements and thus appropriately achieve the course objectives.

19.   The student must inform the college when there are diseases related to immunodeficiency

20.   The student deals only with patients specified by the clinical coach, for example, it is forbidden to deal with patients suffering from infectious diseases, or patients who are incarcerated.

Prevent exposure to infection

1.   Maintain good health and increase immunity

2.   Frequent hand washing

3.   Carefully assess the risks of situations before starting

4.   Follow all instructions for personal protective equipment

5.   If exposed to any infectious agents (such as tuberculosis, corona, meningitis), the student must inform the supervisor and then inform the college and complete the recommended follow-up tests.

- ## **Acute injuries and needlestick injuries**

For acute/acupuncture injuries, nursing students should immediately wash the area with soap and water and "massage" the area to encourage bleeding. Viruses begin to multiply rapidly once in the bloodstream, so preventing them from entering the bloodstream in the first place is very important.

The student's blood is drawn at Student Health Services as soon as possible

a. HBsAg

b. Antibody to Hepatitis B Surface Antigen (Anti-HBs)**

c. Hepatitis C Antibody

d. Anti-HIV

e. Omit HBsAg & Anti-HBs if the student has a documented seroconversion following a Hepatitis B vaccination series

f. Order CBC and Liver Function Test

Student Services at the Hashemite University

:Student Services and Welfare Department

This department works on taking care of students in many ways as they are the center of the academic and educational process, by providing the services they need, and helping them to overcome the problems they may face in order to improve their efficiency and obtain the highest levels of university adaptation to reach them to distinct educational learning outcomes. To translate these goals, the department has taken upon itself to provide the following services:

:First: Financial Aid

أ.   Receiving and studying applications for grants and refundable and non-refundable loans for needy students (Student Fund).

ب.   Receiving applications for loans and scholarships (higher education) once a year.

ج.   Auditing the grants of the top academic departments and sending them to the Ministry of Higher Education.

د.   Employing students in the university facilities for a certain fee, provided that this does not conflict with the times of their lectures. This is done in two periods:

1.   Chapter one.

2.   Chapter II.

ه.   Providing exceptional financial aid to students.

:Second: Psychological and Social Counseling Services

It is provided through the Psychological Counseling Division, where its objectives are divided into **developmental** (providing elements and conditions for integrated and balanced growth including physical, mental, psychological and social aspects), **preventive** (avoiding the occurrence of the problem and disorder by removing the causes that lead to its occurrence), **and curative** (helping to solve problems both at the level of individual or group), through the following:

أ.   Helping new students to adapt to their new university life and overcome the obstacles they may face.

ب.   Guiding students and directing them socially, psychologically and academically.

ج.   Paying attention to the students' various problems and issues and working to solve them or mitigate them, and overcoming any obstacle or difficulty that stands in their way during their studies.

د.   Helping students with special needs integrate into the university environment, and overcome the difficulties they may face by conducting their own studies.

ه.   Preparing brochures and brochures.

و.   Preparing for workshops, lectures and seminars on topics of interest to students, which aim to raise their awareness and provide them with information that contributes to preventing them from falling into difficulties.

:Third: Providing care for students of primary harm (those with special needs)

The Disabled Students Welfare Division represents the link between students with disabilities

.at the university and the local community

أ.	Audio recording of study materials and their conversion from written to audible materials for blind students.

ب.	Providing sign language translation services for deaf students.

ج.	Helping students with disabilities of all kinds in writing their exams.

د.	Providing courses in sign language for ordinary students and employees of the university.

ه.	Overcoming the difficulties they may face inside the university.

و.	Organizing extra-curricular activities that support their presence within the university.

ز.	Preparing for workshops and seminars that introduce students, faculty and administrative staff of the university to students with disabilities and their needs.

ح.	Providing assistance to students with disabilities in the exemption procedures allocated to them.

ط.	Helping students with disabilities to integrate into the university environment, to overcome the difficulties they may face by conducting their own studies, and to involve them in educational courses that will benefit them.

ي.	Preparing brochures and brochures for students with disabilities.

Department of cultural and artistic activity:

The Department of Cultural and Artistic Activity, in both its parts, is concerned with working to absorb the creative energies and the cultural situation of youth in all fields of culture and art. And seminars and courses to bring the cultural product - which is mainly from and to students - to broad horizons and more interactive with the local community and the outside community.

The Department of Cultural and Artistic Activity has spaces in various types of arts, where the university choir ensemble accommodates everyone who has the desire and ability to play and sing, and with the same ability, the folklore troupe emerges as a form of production of Jordanian folk culture.

The university studio offers various courses in Arabic calligraphy, drawing and handicrafts within the university's philosophy in line with its role in nurturing various artistic talents. Hence the university theater laboratory, which works on developing theatrical projects and ideas and works on developing individual abilities in the art of theatrical representation.

Based on this, the Department of Cultural and Artistic Activity invites our university students to take the initiative and register in various activities, and to benefit from the extra-curricular facilities and programs that will advance our university and our country. The department includes two divisions:

1. Cultural Activity Division.

2. Technical Activity Division.

Department of sports activity:

Facilities of the Sports Activity Department:

The Department of Sports Activity includes indoor and outdoor playgrounds on which various sports activities are held:

أ.   Indoor stadiums:

1.   A multi-purpose indoor gymnasium, where the following games can be played: basketball, volleyball, handball, tennis, badminton, fitness and general exercises, gymnastics, self-defense games, table tennis, in addition to football pentathlon and others One of the games that can be played indoors.

2.   Semi-Olympic swimming pool, closed, heated, and equipped with the latest sterilization methods.

3.   A self-defense hall where the following games can be played: Taekwondo, Karate, and Judo.

4.   Table tennis hall equipped with the latest tables to play the game.

5.   Two (2) international squash courts.

6.   A multi-purpose hall with a wooden floor (parquet) where it is possible to practice various exercises and sports such as: table tennis, badminton, various aerobic exercises, gymnastics and other games, in addition to physical education lectures.

7.   A private room for chess practice.

8.   The fitness hall (Iron), includes the latest equipment for strength training and has programs that include: Regular activities for university students in general, and for university sports teams in particular.

9.   Indoor dormitories: equipped to accommodate (50) people.

10.   A special cabin to receive VIPs.

11.   It contains the cups and prizes obtained by the different university teams and in all games.

ب.   Outdoor stadiums:

1.   Tennis courts with international standards.

2.   Basketball courts.

3.   Handball courts.

4.   Five-a-side football pitches.

5.   Volleyball court.

6.   Free activity volleyball court.

The Department of Sports Activity organizes sports courses of different levels in many sports to select the distinguished athletes, to develop the students' sports skills. These courses include:

1.   Educational swimming courses for beginners (not mixed).

2.   Racquet games for beginners (unisex).

3.   Fitness courses.

4.   Courses in group games and according to the students' desire.

5.   Courses in self-defense games for beginners and obtaining multiple belts.

6.   The annual tele-match festival for university students.

The department includes the following divisions:

1. Sports Facilities and Establishments Division.

2. Division of Supervision and Teams.

.Division of roving and camps .3

King Abdullah II Fund for Development Office/ Vocational Guidance

:Services provided by the office

Providing advice and technical advice to students to enhance their capabilities in obtaining .available job opportunities

Providing the requirements and means for students to move from the academic university .environment to the professional and practical environment of the labor market

Helping students and graduates to define their professional goals and trends, by identifying - .the individual skills required in different professions

Opening channels of communication between the student community in universities, private .sector activities and civil society organizations

Providing university students with training opportunities in companies, banks, hospitals, and .leading national institutions

Receiving grants from the King Abdullah II Fund for Development, the Princess Muna Fund for Nursing Support, Zain Company and the Jordanian Cigarette Company at the beginning of .each academic year

Organizing a set of training courses and workshops, with the aim of refining the student's - personality and providing him with specialized expertise, thus preparing him for the labor .market in the most optimal way

Nominating students to represent the university by participating in creative forums, training - courses, workshops, meetings, youth camps and conferences, on the local, Arab and .international levels

University's library

:Services provided by the library

RFID system for managing and protecting the library's holdings , which is one of the most .modern lending systems in the world

The automatic search service in the general catalog of the library: where the researcher -2 can know the contents of the library by searching the automatic catalog of the library from .anywhere in the world where Internet services are available

The services of Arab and foreign periodicals, in their printed and electronic forms, in various -3 .fields of human knowledge

:Reference services and audio-visual materials -4

an .estimated (20,000) references in various disciplines

The Family and Childhood Library: The Hashemite University library was separate from -5 the universities in Jordan and the Middle East by establishing a library for children. The nature of the furniture, decoration and books for childhood was taken into account when establishing .this library

Also, through cultural agreements between the Hashemite University and a number of 6-foreign embassies in the Hashemite Kingdom of Jordan and some local institutions, some cultural pillars have been established in the library:

A- **The American Corner:** In cooperation with the Embassy of the United States of America in Amman, a large hall has been allocated in the library and has been equipped with furniture, shelves, publications, electronic devices and screens, in which various activities are held.

B- **Social Work Corner:** In cooperation with the Abdul Hameed Shoman Foundation, this corner specialized in community and family service was established and equipped with the necessary furniture and publications related to social work. Also, many activities and special lectures are held in this corner, benefiting the students of the Hashemite University.

C- **The British Corner:** In cooperation with the Embassy of the United Kingdom in Amman, it contains many publications, books and periodicals related to the English language and literature.

D- **The Canadian Corner: The Canadian Corner** was inaugurated in cooperation with the Canadian Embassy in Amman, where a hall was allocated in the main building of the library and equipped with furniture, publications, electronic devices and display screens. This library is specialized in Francophone culture.

Library building :

The total area of the building is about (12,000) square meters and contains three floors distributed as follows:

a. The ground floor includes:

1.   Free reading room.
2.   Ongoing journals hall.
3.   Library of Her Highness Princess Iman bint Abdullah II, the glorified family and childhood.
4.   Hall of Arab and foreign references.
5.   Catalogs Hall (computer-based mechanism).
6.   Audio-visual devices.
7.   Division of Information Services and Databases.
8.   Check out and return counter.
9.   Photostatic photography.
10.   The offices and hall of the technical department in its departments (Supply Division and Cataloging and Classification Division).
11.   Library management.

B. The first floor includes:

1.   Hall rack booking.
2.   Stores and reading rooms for foreign books.
3.   Hall of Arab periodicals vol.
4.   Hall of Foreign Periodicals Vol.

5. .Internet lab and auditorium

6. .Photostatic photography

7. .Staff rest

8. .The men's chapel and the women's chapel

<u>:c. The second floor includes</u>

1. .Stores and reading rooms for Arabic books

2. .Photostatic photography

1. The general index (automated index based on the computer**Online - Catalog** and how to (
:use it

The General Catalog is an arranged collection of bibliographic records indicating the library materials available in the library. Before benefiting from the library, every researcher needs to :refer to this index, which has been prepared to serve two main purposes

1. Providing entrances through which the reader can know whether the material he wants is available in the library, as well as knowing and identifying the available materials related to .any topic he wants to view

2. Giving the reader some information about this material, such as its location and subject in general, in addition to other information related to its place of publication, the name of its .publisher, year of publication, number of pages, and any other explanatory notes

:Instructions for using the automated (computer-based) index .1 :5

1. " To write in Arabic: we press the**Alt + Shift** .key from the right "

2. " To write in English: we press the**Alt + Shift** .key from the left "

3. .The hamza is neglected at the beginning of the words

To search for the word :Example" Islam", type" Islam" .

: To search under a field

أ. .Address : We write the address in the address field

ب. .Subject : We write the subject in the subject field

ج. .Author : We type the author in the author field

" Then we press the**Enter** " key .

- ,It is possible to link more than one field by typing the basic information in each field " then pressing the**Enter** " key .

- .A number appears in the result count indicating how many titles are in the library

- It is possible to move to the next or previous title through the "previous record" or "next .record" buttons that appear on the screen

- If "No records matching this query" appears, it means that the title, subject, or author .you want to search does not exist in the library

- .To start a new inquiry, click on the "Inquiry" button at the top of the screen

Student Fund System at The Hashemite University

The Student Fund aims to appreciate the practical excellence of students, develop their respect for manual work and meet their needs, by providing grants or loans to them, or employing them for specific hours inside the university.

The fund's resources consist of:

A- An annual grant provided to the fund from the university's budget.

B - Gifts, donations, grants and bequests presented to universities in support of the Student Fund.

C- The proceeds of the fund's money and investments.

D - Loans recovered from students.

Student Fund Executive Instructions:

First: Grant Instructions:

Scholarships for students aim to:

Encouraging academic excellence for students.

Meet the students' urgent financial needs for needy students.

Scholarships include:

A- The Fund provides scholarships to the top students in the different departments and years at the university.

b- The Fund provides grants to students who are in dire need of emergency financial assistance, as determined by the committee.

For top students at the Hashemite University, quarterly discretionary grants are granted, the value of which is determined at the beginning of each academic year, according to the following:-

The first rank for all years is determined on the basis of the general average for the first and second semesters, provided that the study load is not less than (15) credit hours for each semester.

The top students at the first-year level in each college are given a number of discretionary grants equal to the number of departments in the college.

With the exception of first-year students, the first student in each department is given one discretionary scholarship.

The committee allocates grants to help students in emergency cases if the following conditions are met:-

أ- The application must be registered to obtain a university degree and its financial situation requires urgent assistance.

ب- Not to be an envoy from a government or other authority.

ج- That he does not receive a periodic salary from any party whatsoever.

:Second: Loan Instructions

.The loans granted to students aim to encourage them to continue their studies at the university

For students registered at the Hashemite University to obtain a university degree, quarterly or annual loans are disbursed as the committee deems appropriate according to the following :conditions

أ-   That the application proves its need for the loan, according to the principles decided by .the committee

ب-   .Not to be delegated by an official body, or others

ج-   .He shall not be an employee or receive a periodic salary from an official body or others

د-   That he does not receive sufficient financial aid as the committee deems appropriate in .each case

ه-   .Not to have a scholarship at the university

و-   The student must not have been registered and enrolled in the study for at least one .semester

ز-   .That no disciplinary sanctions have been issued against him

:Third: Operating Instructions

.Employing students aims to develop their respect for work and help meet their financial needs

أ-   Colleges and administrative units inform the Student Fund Committee, before the start of the academic year, about the preparation of students they wish to employ, the number .of hours proposed for employment, and the conditions they wish to meet in the student

ب-   After studying the information contained in paragraph (a), the committee determines .the annual amounts for each college or administrative unit

ج-   The college or administrative unit announces the employment opportunities available .to it

د-   Colleges or administrative units assign the names of students to be hired to the .committee to issue the appropriate decision

أ-   The college or administrative unit maintains a complete record of the students who :work in it, showing the following matters

1.   The student's name, national number, residence address, telephones and place of .work

2.   .work nature

3.   .The weekly program with an indication of the weekly hours scheduled for the student

4.   .Note to the college or administrative unit about the student's work

B- Providing the colleges and administrative units with the Finance Department with monthly schedules showing the names of the working students and the number of hours they worked .in accordance with the decision issued by the Student Fund Committee

C- Every student who does not perform the work assigned to him in accordance with the requirements of the work, the decision to employ him is considered canceled and he is required .to refund the amounts he received

d- Every student who is dismissed from work for disciplinary reasons is prohibited from .benefiting from work opportunities for the period determined by the committee

Incentives for outstanding students in activities accompanying the university curriculum

The university provides incentives and/or financial support for outstanding students in sports activities (including team and individual sports) approved by the Sports Federation of Jordanian Universities and the official sports bodies in Jordan, as well as cultural activities (story, poetry, literary article, recitation) and artistic (singing). , music, drawing, theater, folklore, plastic arts) and social (volunteer work).

An outstanding student participating in the university's sports, artistic, cultural or social teams . may be granted a financial reward for one time in the academic year in which he achieved achievement or superiority, provided that the number of students of both sexes for all concerned departments in the Deanship of Student Affairs does not exceed (20) according to the following :

أ- dinars if he or his team or team gets first place in the tournament or activity at (200) the level of Jordanian, Arab or international universities.

B - (150) dinars in the event that he or his team or team gets second place in the championship or activity at the level of Jordanian, Arab or international universities.

ج- dinars if he or his team or team gets third place in the tournament or activity at (100) the level of Jordanian, Arab or international universities.

د- dinars in the event that he obtained first place in a championship or activity at (150) the local, regional or international level and was not included in the university's sports, cultural, artistic or social teams in the Deanship of Student Affairs, provided that the president of the university approved by the Dean of Student Affairs his participation in The tournament or activity, provided that the tournament or activity is recognized by the concerned official authorities in Jordan, and documents that indicate that he has won the first place, certified by the authority concerned with the game or activity in Jordan.

E- A distinguished student may not combine two rewards in the same academic year for his distinction, regardless of the number and type of his participation, but he may combine his reward with the reward of his distinguished team if his team deserves a reward.

F - A student who is dismissed from study or university for any reason in the semester that has achieved achievement or excellence loses his right to incentives of all kinds.

2. It is permissible to award an outstanding university team (athletic), provided that the number of students in the approved sports team is in accordance with the instructions of the Jordan Olympic Committee, the concerned sports federations and the Sports Federation of Jordanian Universities, or culturally, artistically or socially, provided that the number of students is in the cultural, artistic, or Social Security, approved by the Dean of Student Affairs), a financial reward for one time in the academic year in which he achieved achievement or excellence, according to the following:

أ-   dinars for each participating student in the event that his team or team gets first (150) place in the tournament or activity at the level of Jordanian, Arab or international universities.

B- (100) dinars for each participating student in the event that his team or team gets second place in the tournament or activity at the level of Jordanian, Arab or international universities.

ج-   dinars for each participating student in the event that his team or team gets third (50) place in the tournament or activity at the level of Jordanian, Arab or international universities.

D- The distinguished team may not combine two rewards in one academic year, regardless of the number and type of participation, and the higher reward is calculated for it.

Instructions of the Student Council at the Hashemite University

The council is formed on the university campus from the elected students in each faculty according to the established representation and aims to achieve the following:

A- Developing the spirit of loyalty, belonging and pride in the country, land, people and system.

b- Developing the spirit of loyalty, belonging, and conscious and deep pride in the nation's belief, thought, heritage, ideals and values.

C- Supporting student activities in the scientific, cultural, social and sports fields.

D - Strengthening the spirit of cooperation and the concept of social work.

E - Follow up on students' issues, make them aware of their duties, preserve their achievements, and work with the university administration to solve their problems.

F- To develop the spirit of dialogue and respect for the opinion of others.

g- To develop the student's self-awareness of the various issues of the nation, and to promote belonging to the university, the homeland and the nation, within the values of Arab-Islamic civilization and heritage.

H - Providing opportunities for positive interaction between the student body, departments, colleges and university administration.

I - Working on the unity of the class and strengthening the bonds of national unity.

J - Advocating for the issues of the homeland and the Arab Islamic nation.

K- Preparing the student to exercise his humanitarian, social and political role with awareness, creation and responsibility in a society of dignity, freedom, justice and equality.

L- Focusing on belief in virtues, values and good citizenship.

M - Consolidating the values of voluntary work in support of voluntary charitable projects and works.

N - Deepening the student's concept of democracy and his commitment to its principles, ethics and practices, and developing his knowledge of its institutions and the importance of these institutions.

O - Implementation of educational, cultural and social programs that enhance in the student the love of Jordan with all its geographical, human and heritage components.

P - Taking the hand of promising leaders from the students.

P- Providing the student with the skills and competencies that qualify him for conscious participation and responsibility in political life and working to give priority to the national interest.

R- Taking care of and encouraging creative and scientifically distinguished students, and creating the appropriate atmosphere for them to serve their possible studies and scientific research, especially those related to the service of performance development within its comprehensive framework.

The number of members represented in the council is proportional to the number of students registered in the college, and the university council determines the percentage of representation once a year at the first meeting that follows the announcement of the official numbers of students enrolled in different faculties at the beginning of the second semester of the academic year.

أ- Voting in elections is the right of every member of the general assembly, provided that a member has one vote.

ب- Council elections take place during the second semester of each academic year and for one year, as follows:

1. Each college in the university is considered one electoral district.

2. Students in each college elect their representatives to the council directly, according to the percentages specified in Article (5) of these instructions.

3. Elections for council membership will take place on one day only, provided that the voting process begins from nine o'clock in the morning until five o'clock in the afternoon.

4. The university president issues the internal rules for conducting elections.

The Council shall hold its first meeting to elect the president, vice-chairman, secretary and members of the committees from among its members, within two weeks from the date of announcing the election results, provided that the times and dates of its meetings shall then be determined.

Board meetings are public.

C-1- The meeting of the Board is legal if attended by the absolute majority of its members.

2- The decisions of the Council shall be issued by a majority vote of its members present.

The Council has the following duties and powers:

Discussing and approving the council's work plan.

Discussing and approving the administrative and financial reports.

Discussing the council's budget and submitting it to the university president to refer it to the university council for discussion and approval.

Recommending to the university president the amendment he deems appropriate to these instructions.

Make decisions and recommendations that it deems appropriate to achieve its objectives.

Important university policies

1.   If you do not register for a semester, you will be considered as having dropped out, and your registration at the university will be considered void unless you submit an acceptable excuse to the competent authority.

2.   You can withdraw from studying one or more subjects within a maximum period of weeks from the start of the first and second semesters, and (6) weeks from the start of the (13) summer semester, and this is done according to a special form obtained from the Admission and Registration Unit.

3.   If you miss more than (15%) of the prescribed hours for one subject without an excuse accepted by the dean of the college in which the subject is offered, you will be deprived of applying for the exam for that subject and you will get a zero for the university in it.

4.   If your total absence with an acceptable excuse exceeds (15%) of the prescribed hours for all semester subjects, you are considered to have withdrawn from that semester, and your study for that semester is considered postponed.

5.   If you wish to withdraw from all the courses you have registered in a semester, you may do so with the approval of the Dean of your college, and you must apply for this at least two weeks before the date of the final exams.

6.   If your cumulative GPA drops below (2.000) points, you will receive a warning, and in order to cancel the warning, you must raise your GPA to (2.00) points or more within two semesters from the date of the warning.

7.   If you are unable to raise your cumulative average to (2) points after the warning in a maximum period of two semesters, you will be dismissed from the major, with the exception of the student who completed (99) credit hours according to his study plan and with an average of not less than (1.90) points.

8.   If your cumulative average is less than (1.50) points, you will be separated from the major in any semester after the first semester.

9.   You can review your mark in the final exam for any subject within a maximum period of two weeks from the end date of the exams, in return for a fee of two dinars for each request you submit to review one of your grades.

10.   To take advantage of grants, loans and employment, you must visit the Student Services and Welfare Department to fill out the relevant forms during the advertisement period.

11.   The loan you get is a debt that is due to be paid after you graduate from the university, and it is hoped that you will pay it directly so that the university can re-lent it to other students.

12.   Forging university documents or using forged papers for any of the university's purposes may expose you to annulment of the decision to grant you a university degree.

13.   The instructions and instructions issued by the university are approved and official. As for the information that you receive through transportation or other methods, it is inaccurate.

14.   The university was established for you and your children after you, so you must preserve its property and facilities, and your affiliation should be purely to it.

15.   The cleanliness of the university reflects the cleanliness of its students, so keep it clean and beautiful to reflect the civilized face of a lofty scientific edifice.

16.   The Hashemite University is a distinguished scientific edifice. All modern facilities and capabilities have been taken into consideration in its establishment. My brother the

student, all you have to do is take advantage of these facilities and equipment that have been created for you.

17. Feel free to check with your teacher during office hours for review.

18. Use your mentor and review it in your study plan at the appropriate time during class.

19. The library is a modern edifice equipped with the latest technologies, so do not hesitate to benefit from it and make the best use of your spare time.

20. Advertising is the main means of communication with students, so you, the student, have to look carefully at the bulletin boards scattered in the university buildings.

21. Your university ID is an important document that you must keep and carry with you constantly. And when it is lost, the Department of Student Services reports it within a week.

22. When you encounter any problem, you should refer to the Deanship of Student Affairs / Department of Student Services, which is concerned with helping you.

23. Do not hesitate to provide assistance to your colleagues with special needs.

24. Submit medical excuses issued by a non-university doctor for approval within a week from the date of the report.

25. Reports approved by physicians other than the university doctor shall be submitted within (72) hours for approval by the university clinic physician.

26. Medical reports issued by private sector doctors during final exams are not accepted.

27. Only reports issued by hospitals and centers of the Ministry of Health and the Armed Forces are approved.

28. When you have completed your enrollment and paid the fees for each class you enroll, you must go to the clinic to place the health insurance label that authorizes treatment for that term.
